

epio process

AACER is a leader in court data and associated process automation, serving loan originators, loan servicers, collection agencies, investors and lawyers. AACER's data automation, portfolio management tools and managed services drive operations cost and risk reduction, revenue recapture, and investment insights.

AACER empowers our clients to supplement or reinvent their critical processes to reduce cost and risk, and make more money.

Advanced bankruptcy case search with ease

All courts, all documents, all the time

Our easy-to-use interface with advanced filtering allows our users to search across and within bankruptcy cases and claims registers to deliver the data you need.

Easy, automated, advanced bankruptcy case search

The days of manual, inconvenient CM/ECF based searching are over. AACER delivers automated bankruptcy case search across all active electronic court records for specific events. You can filter results by numerous criteria with one click. It's never been easier to receive bankruptcy case search updates.

Substantially reduced search costs

The more our users search and retrieve documents from courts, the less expensive it is for other users. This crowd-sourced cost reduction is meaningful in reducing your costs.

Stay informed with AACER notification services

Industry leading notification services

AACER is used daily, in all sectors of the industry, to identify new bankruptcy filings across the U.S. bankruptcy court system. Our services include full social security and partial social security, multi-variable identification, and consumer and commercial debtor identification. AACER delivers the highest precision available, including confidence scoring, case coversheet data parsing, links for easy docket access and file formatting for easy consumption of data into users' internal systems.

Additionally, AACER notification includes SCRA/DOD automated search and return of receipt of service or proof of search, as well as reporting of case discharges, dismissals, closing, or case conversions with associated transaction dates.

Stay on top of bankruptcy matters with case monitoring

Efficient case monitoring to manage bankruptcy matters nationwide

Whether monitoring 100 cases or 100,000 cases, AACER automatically delivers critical information enabling you and your staff to efficiently and effectively manage case work, and investment and credit portfolios. AACER monitoring highlights and tracks critical case activity, safeguarding completion and compliance in every matter.

Customize your preferences

Monitoring results can be delivered on your schedule, in multiple formats directly into your system to automatically trigger additional activities.

Audit and compliance

With AACER, you get tailored reporting for internal compliance requirements, external audit or to satisfy investor demands. This solution reduces time and cost for both financial institutions and their counsel.

Automated reporting

We deliver only critical docket and claims information into workflow queues you customize to best suit your processing needs, immediately streamlining your internal workflow. With AACER disposition monitoring, you'll receive a daily report of disposition changes, giving you a clear picture of relevant electronic court records including dismissals, closings, discharges, and conversions recorded for all your cases during the previous business day. This dramatically compresses your timelines, increases your ability to react, and is a vital component for credit reporting.

Data extraction and reporting, simplified

AACER provides all manner of data extraction from within documents, including the gamut of key bankruptcy court filings, and related reporting. We pair our leading, proprietary document extraction and optical character recognition (OCR) technology with our expert managed services team to ensure you get the key data you need whether it's 1,000 or 1,000,000 data points. This includes to automate your loan

servicing operations, loan audit activities, document production for mailings, investment decision making or for whatever your use case.

Leading bankruptcy loan audit services

Our leading loan audit services blend experienced, expert bankruptcy analysts with proven, proprietary data and process automation to reduce costs, cut risk, and increase turnaround time.

Clients use AACER for loan onboarding and ongoing maintenance audits, servicing transfers, regulatory remediation, payment history reconciliations (including prior servicer history), point-in-time data analysis for various stages of bankruptcy, investment due diligence, and more.

End-to-end document production, filing automation, and mailing

Together our leading, proprietary document creation automation platform and globally-reaching mail fulfillment services create a complete end-to-end solution.

Fully automate your work with our APIs

With AACER APIs, you can search, monitor, obtain case details, and more for all of your portfolios or cases without human intervention. This minimizes human errors, manual steps, and risks that accompany origination, servicing, investing and other activities.
