Support and Assist

Select, Build, or Optimize

- **Select and configure software that ensures compliance, supports business needs, and delivers ROI.**

Why Epiq Legal Solutions?

Experience the advantage of solutions from a partner specializing in legal.

Drive decisions with AI solutions that combine people, process, technology, and data.

Access real-time metrics and dashboards.

Eliminate manual and redundant processes.

Epiq Differentiators

— Confidently implement compliance programs working with senior leaders who collectively have 100+ years' experience meeting regulatory requirements.

— Save time and costs by working with a single experienced partner to assess, build, and support your compliance program.

— Gain previously unknown insights from the information resident within your systems working with data scientists.

How To Build an Effective Compliance Program

Read the Blog

Key Features

Assessment

- Meet business requirements with a bespoke assessment.
- Enhance compliance maturity and resiliency with targeted recommendations.
- Drive efficiencies by identifying AI and other technologies that can be applied to compliance controls.
- Engage a variety of stakeholders within your organization with interviews to ascertain awareness, commitment, and risk tolerance.
- Execute recommendations based on prioritized one, two, and three-year goals.

Select, Build, or Optimize

- Evaluate and identify software that meets your functional compliance and technical IT requirements, collaborating with procurement if desired.
- Ensure software ROI through proper configuration, streamlined workflows, selective data migration, thorough testing, and comprehensive report creation.
- Mitigate compliance risk by conducting effective pre- and post-due diligence on mergers, acquisitions, and joint ventures.
- Seamlessly onboard acquisitions with policy and training integration, systems integration, and updated reporting.
- Ensure completion of a consent decree or deferred prosecution agreement provisions with project management and compliance operations expertise.
- Raise awareness of ethical AI use among employees and third parties through a certification program.

Support and Assist

- Free up internal teams with support from onshore, offshore, and AI resources for training, monitoring, reporting, clearing due diligence, and managing policies.
- Reduce organizational risk through the real-time identification of potential misconduct.
- Triage potential compliance red flags by connecting the dots between data points and documenting your findings.
- Ensure long-term technology performance with system administration support.
- Strengthen third-party risk management by conducting risk-based vetting and resolving potential issues before contracts are signed and ongoing monitoring.
- Identify and address root cause following compliance infractions with expert support.
- Maintain compliance policies, training, certifications, reporting, and ongoing excellence with managed services.
