

Implement a CLM solution aligned to business processes, data, and system requirements.

Leverage the expertise of certified contract lifecycle management [CLM] and AI resources to build the capabilities available from Agiloft, Leah, Malbek, and Ironclad.

- Measure success and increase visibility to leadership with defined KPIs and custom smart reports and dashboards.
- Ensure your CLM meets your business needs with an expert assessment that measures your current state against best practices.
- Increase efficiency across business functions by connecting master data and automating processes.
- Learn how to empower your teams to drive increased adoption and ROI.

Why Epiq Legal Solutions

Experience the advantage of solutions from a partner specialising in legal.

Drive decisions with AI solutions that combine people, process, technology, and data.

Legal

Enable legal teams to align CLM capabilities with business needs, assess readiness, build a tailored system, and enforce guardrails for efficient, risk focused contracting.

Procurement

Manage costs and relationships by implementing a CLM and AI solution to support supplier management, contracts negotiation, and spend analysis capabilities.

Sales

Accelerate deal closure and strengthen client relationships by implementing CLM and AI integrated with procurement and accounts payable [AP] systems, enabling contracts visibility.

Differentiators

- AI implementation and advisory with Epiq AI™ and Epiq Contract Analyser.
- Strengthen long-term CLM adoption with a consultative approach that engages end users at the onset to design the implementation.
- A team that works on CLM implementation and optimisation projects in conjunction with transformation strategy, managed services, legacy contracts migration, and contracts intelligence.
- Legal AI experts for custom model training, extraction validation, risk assessment playbooks, and workflow automation.

Readiness: The Most Overlooked Phase of CLM Implementation

Key Features

Enterprise Transformations

- Evaluate and improve your contracting process across legal, sales, procurement, IT, finance, and HR.
- Plan for change and prepare teams for success with a dedicated change lead and a CLM-focused change management team guiding adoption throughout implementation.
- Partner with experts to connect disparate systems and standardise the flow of data.

AI

- Integrate AI into your CLM strategy, whether as a standard layer within your CLM or as a stand-alone solution with expert advisory.
- Drive efficiency with AI CLM services that automate negotiation, risk assessment, and compliance. Notify legal approvers, compare negotiated language to approved playbooks, and improve legal team performance.

Data

- Define success metrics at the beginning of each project to understand the business impact and measure data points that are important to you.
- Serve various business functions with a centralised contracts repository that is a single source of truth across your enterprise.
- Measure ROI through contracts lifecycle and performance analytics. Mitigate risks and capture opportunities, improve visibility of KPIs to leadership, and access real-time dashboards and reporting.

People

- Support compliance and promote improved future state processes with expert advice on successful CLM governance and administration.
- Increase user and admin adoption through personalised role-based training that emphasises how the CLM system aligns with their needs.
- Launch a purpose-built centre of excellence [COE] to support CLM administration, onboarding, and ongoing management.
