

Accelerate time-intensive tasks and uncover critical insights within Relativity.

Speed Review and Analysis

Enable smarter, faster review and analysis in RelativityOne and Relativity Server using AI to generate document summaries, image narrations, translations, and OCR text in native file formats.

Identify Key Insights

Reduce risk and gain an information advantage using AI to access critical insights from multilingual documents, images, non-searchable PDFs, and long or complex documents.

Why Epiq Legal Solutions

Experience the advantage of solutions from a partner specialising in legal.

Drive decisions with AI solutions that combine people, process, technology, and data.

Automate Complex Tasks

Reduce manual effort by automating complex tasks in Relativity with one natural language command.

85%

or more cost savings compared to human review

45x faster

Differentiators

- Speed processes with Relativity integration that does not require external tools or platforms.
- Retain original document formatting through translation and OCR processes.
- Improve searchability with customisable prompts for image narration and flexible options for document summarisation.
- Convert hard-to-read handwriting, such as that found in pharmaceutical and engineering documents, into text.
- Receive translated Excel content delivered back in its original Excel format to retain context formatting and layout provide.

Key Capabilities

Epiq Assist

Quickly uncover hidden connections and insights, develop strategy, and generate impactful work product using natural language questions.

- Question the entire dataset at one time.
- Review, tag, and create a saved search for the source documents in the Relativity viewer.

OCR Plus

Increase OCR accuracy using AI to process handwriting, foreign language, and images in their native format.

- Recognise text in poor quality documents with complex layouts.
- Process multi-language documents, including character-based languages like Japanese.

Image Analyse

Enable search and filtering for images by generating customisable image descriptions.

- Customise descriptions to enhance searchability.
- Adjust analysis based on user-provided context or questions.

Summarise

Speed document review by summarising large, complex documents for easier analysis.

- Adjust length to condensed or standard sizes.
- Provide summary in key point or paragraph format.

Translate

Improve translation accuracy and speed with AI that preserves formatting while translating multiple languages simultaneously.

- Facilitate search and review with translations in both text and native file formats.
- Ensure consistent and accurate translations using a custom glossary.
- Order and receive human translation services without leaving Relativity.

Language Detect

Identify document translation needs faster using AI to detect all languages in a single pass.
