

Shape case strategy early with fast insight into the most relevant data.

Evaluate matter claims and risk exposure early using an integrated eDiscovery and AI platform to reduce the time and cost of processing, culling, and data analysis.

- Accelerate access to data using processing up to seven times faster than leading alternatives.
- Gain early clarity on custodians, concepts, and data volumes with intuitive search and early data assessment capabilities.
- Identify potential risks faster without the cost of external resources.
- Find deeper insights using Epiq Assist conversational AI to identify hidden relationships and connections in the data.
- Reduce downstream review costs by narrowing the relevant document scope.

Up to
7x
faster processing

Reduce data volumes between
60-85%

Conduct fact research up to
45x
faster

Why Epiq Legal Solutions

Experience the advantage of solutions from a partner specialising in legal.

Drive decisions with AI solutions that combine people, process, technology, and data.

Differentiators

- Enter limitless queries in Epiq Assist to interrogate all or part of your data without incurring extra charges.
- Use advanced culling, search, and AI tools in one integrated platform accessible through the Epiq Service Cloud.
- Avoid missed details with AI that uses a knowledge layer to gather factual intelligence in the data and applies logic to identify deeper insights.
- Intuitive dashboards and searching tools cut and filter data quickly, uncovering decisions faster and reducing time horizons.

Epiq Assist

Evaluate risk exposure and sharpen case strategy faster using Epiq Assist to uncover deeper insights.

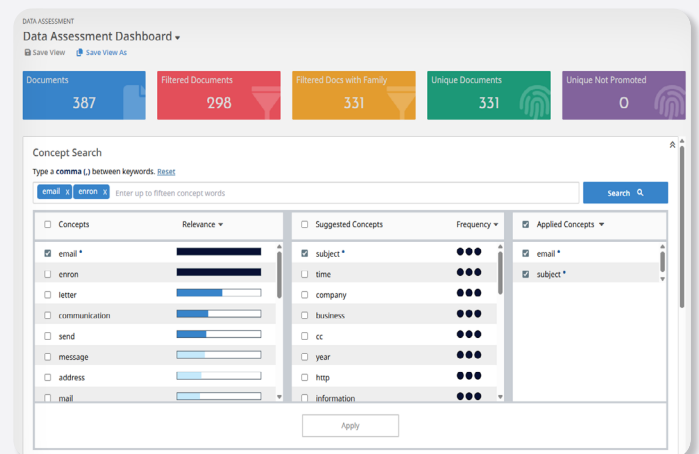

- Ask limitless, natural language questions about themes, patterns, players, events, and other key facts.
- Receive instant answers with links to source documents.
- Run queries across the entire dataset, multiple documents, or within a single document.
- Generate timelines and summaries to analyse events, communications, and relationships.
- Retain a history of questions and answers for ongoing reference.

Data Culling

Focus on the most relevant information faster by accelerating data access and analysis.

- Collect and process modern attachments from Microsoft Teams chat and Outlook.
- Use repeatable search filtering in processing automation to cull data before early case assessment.
- Analyse data based on conceptual relationships.
- Use the intuitive search builder to quickly build complex queries.
- Adjust keyword filters using a Keyword Management panel.

Handle ECA in-house or use the experienced Epiq Case Insights™ team to quickly filter and gather the insights you need.
