

Optimise legal service delivery with innovative legal operations strategies and disciplines.

Unlock the power of your team to manage risks, control costs, and create value for the corporation by adopting the latest legal function management strategies.

- Align and scale legal operations to achieve your business strategy.
- Enable efficient processes with a holistic operations platform.
- Empower a diverse, agile, and collaborative workforce.
- Achieve data agility that supports strategic decision-making.

Legal Service Delivery

Assess organisational capabilities, address gaps, and build actionable roadmaps to sequence key initiatives for sustainable transformation.

Analytics and Data Insights

Demonstrate the value of the legal and compliance functions supported by a team that combines legal and analytics expertise to drive actionable insights.

Innovation Labs

Meet business objectives and overcome complexity faster by working with process, technology, and data experts who empower your team to develop solutions through structured ideation, prototyping, and testing.

Expert-Led Managed Solutions

Extend your team with experts who design and orchestrate a legal service ecosystem that includes spend management, tech stack optimisation, workflow automation, and actionable dashboards.

Compliance Programme Effectiveness

Calibrate ethics and compliance programming to your regulatory obligations and risk profile while capturing and analysing cross-functional data for effectiveness monitoring.

Operations Platform Enablement

Integrate operational disciplines, technology, legal suppliers, and knowledge management [KM] into a cohesive platform that streamlines workflows and manages costs.

Why Select the Legal Department Advisory Team

Leadership Experience

Engage experts who have led innovation as executives in legal departments, law firms, legal service, technology providers, and global professional organisations.

Technology Expertise

Leverage technology knowledge that encompasses AI, enterprise legal management [ELM], e-billing, document management, intellectual property [IP], contract lifecycle management [CLM], compliance, business intelligence and intake, and workflow automation solutions.

Long-Term Impact

Receive tailored and scalable solutions for each client on time and on budget with results that hold up over time through disciplined change management and knowledge transfer.

Leverage experience from over

300

consulting engagements.

Differentiators

- Laser-focused on legal transformation, empowering lawyers to think and work differently by taking a holistic approach to getting the best results from people, processes, and technology informed by legal intelligence.
- Extensive professional qualifications in law, legal operations, IP operations, compliance, procurement, workflow automation, AI, data analytics, and both legal and enterprise technology.
- Detailed public, private, and governmental experience across multiple industries and geographies, including government entities with specialised security requirements.
