

Build a data foundation that powers legal operations, delivers insights, and enables AI.

Position your firm to meet current and future challenges with a strategy and architecture that treats data as an asset.

- Build a data lakehouse that allows teams to start small and scale quickly.
- Support high-value use cases across business development, pricing, client engagement, resourcing, collaboration, and knowledge management.
- Enable governed, secure data access across cloud platforms to improve visibility to critical data across the matter lifecycle.
- Improve data quality through a governed lakehouse and medallion architecture.

Gain Control of Your Data to Empower the Practice and Business of Law

Eliminate data silos to centralize and secure a consistent, high-quality data foundation.

Build a scalable, enterprise-ready data architecture that supports rapid pilots and firm-wide adoption.

Enable real-time access to trusted data for faster decision-making, predictive insights, and cross-functional reporting.

Reduce long-term technical debt and integration complexity with standardized platforms and practices.

Strengthen AI, Copilot, and knowledge management readiness while reducing future implementation effort.

Establish governance at scale with automation, monitoring, and clear standards to mitigate risk and ensure compliance.

Differentiators

- Complete your foundational data transformation project in as few as five days.
- Retain ownership of your firm's data.
- Deploy AI with clean data for maximum effectiveness with a team experienced in data architecture, preparation, and cleansing.

Why Epiq Legal Solutions

Experience the advantage of solutions from a partner specializing in legal.

Drive decisions with AI solutions that combine people, process, technology, and data.

Trusted by over half of the **Am Law 100** and **Magic Circle** Firms.

Work with a team of **Microsoft Certified** data architects, engineers, and professionals.
