

Simplify, accelerate, and reduce the cost of evidence discovery.

Access critical information faster with an eDiscovery platform that automates workflows, surfaces deeper insights, and scales to handle matters of all sizes, while maintaining quality and defensibility.

Early Case Assessment

Understand your risk exposure, lower costs, and shape matter strategy early by identifying communication patterns, key organizations, custodians, and potentially privileged content before review begins.

Internal Investigations

Accelerate investigations using Epiq Assist™ to ask natural-language questions across the full dataset and surface critical facts and additional areas for investigation.

eDiscovery Review

Reduce review time and cost while improving consistency and defensibility by prioritizing documents and automating classification with Epiq AI™ for Review.

Deposition Preparation

Secure a strategic advantage in witness statement preparation by using Epiq Assist to surface key insights and generate deposition memos and questions up to five times faster.

Human Resources, Employment, and Compliance Matters

Understand potential risks and resolve matters faster by using data analysis, filtering, and Epiq Assist to analyze large datasets and uncover hidden events, relationships, and communications.

Why Epiq Legal Solutions

Experience the advantage of solutions from a partner specializing in legal.

Drive decisions with AI solutions that combine people, process, technology, and data.

Conduct fact research up to

45x

faster with Epiq Assist

Up to 70%

platform cost savings

Up to 7x

faster processing

50%

overall time savings

Connected Workflow

Epiq Discover, [Epiq AI](#), [Epiq Assist](#), and [Epiq Narrate™](#) create a unified experience in the Epiq Service Cloud that accelerates review, streamlines fact development, and connects matters from investigations through trial. With Epiq Discover, user can:

Collect and Process	Analyze	Review
Data Collection Collect data from email, cloud platforms, mobile devices, and messaging tools into a unified, review-ready format.	Epiq Assist Interrogate all or part of the data, generate timelines, and create fact sheets for instant insights with links to source documents.	Data Transformation Accelerate review with AI summarization, transcription, and translation.
Expedited Processing Obtain fast access to data by processing up to seven times faster than leading alternatives.	Early Data Assessment Reduce review volumes, uncover key insights faster, and identify potentially privileged information through domain analysis, conceptual relationship mapping, and keyword refinement.	Automated Classification Classify documents for issues, relevance, personally identifiable information (PII), and privilege using Epiq AI for Review.
	Search Builder Build complex, nested queries with an intuitive interface.	Guided Review Workflows Deliver consistent, defensible results using continuous active learning to prioritize documents and conditional coding to guide reviewers through structured decision workflows.

Differentiators

- Move data from collection to production in just a few clicks with built-in workflow automation.
- Get 24/7/365 access to support.
- Extend internal capacity with flexible full-service and hybrid options for complex matters.
- Meet data security criteria using a platform that holds SOC II Type II certification and is built on the AWS ISO 27001 framework that incorporates guidance from NIST, HIPAA, and international data privacy regulations.
- Enable users at all levels of technical ability with an interface designed for quick onboarding.

Insurer Achieves 66% Data Reduction and Accelerates ECA With AI
