

Analyse data and testify to past events based on reconstruction of both present and hidden data artefacts.

Using court-accepted forensic analysis tools and techniques, uncover intellectual property theft, misuse, harassment, fraud, or other misconduct not always visible through regular document reviews.

- Ensure you can endure court scrutiny by using standard industry tools, adhering to industry standards, and leveraging forensic experts.
- Base strategic decisions on an honest evaluation and a clear data interpretation.
- Choose the ideal forensic data consultants for your case from our staff of recognised experts with proven track records as court-qualified specialists.
- Uncover evidence of intellectual property theft or misuse, internal harassment, civil internal disputes, product liability issues, and altered or forged emails, documents, or PDFs.
- Explain findings through written or live testimony that withstands scrutiny and cross-examination.

Discover	Uncover	Analyse
Look for evidence within laptops, mobile devices, servers, and cloud storage.	Uncover data markers such as file changes, external drive usage, emails or texts sent to personal accounts, and registry entries.	Reconstruct the timeline and context of events using forensic evidence such as user/system activity, metadata, and more.

Why Epiq Legal Solutions?

Experience the advantage of solutions from a partner specialising in legal.

Drive decisions with AI solutions that combine people, process, technology, and data.

Detect Hidden Misconduct

Reconstruct Timelines

Uncover Hidden Data

Epiq Differentiators

- Collaborate with knowledgeable teams who understand data and its limitations.
