

Increase review speed, accuracy, and cost efficiency beyond traditional TAR or linear review.

Reduce review time and cost while improving accuracy and consistency using AI-native software to automatically review large datasets. Gain an early advantage using AI to analyze data, surface hidden insights, and sharpen your strategy. Ensure review defensibility and reduce risk with standard metrics accepted by regulators, courts, and opposing counsel.

- Accelerate review with automated document classification.
- Control costs by updating classification as the matter evolves without triggering additional fees.
- Uncover key insights faster using Epiq Assist™ conversational AI to analyze all or part of the dataset.
- Increase classification and research accuracy with a persistent knowledge layer that gathers factual intelligence and applies logic to identify deeper relationships and patterns.
- Assure data security with AI that does not train public models with client data.

Complete review

90%

faster than traditional TAR or linear methods

Realize

130%

ROI or more

Classify up to

500,000

documents per hour

Automate over

80%

of review

Best Use of Artificial Intelligence in eDiscovery and Litigation, 2026 Legalweek Leaders in Tech Law Awards

Why Epiq Legal Solutions?

Experience the advantage of solutions from a partner specializing in legal.

Drive decisions with AI solutions that combine people, process, technology, and data.

Conduct fact research up to

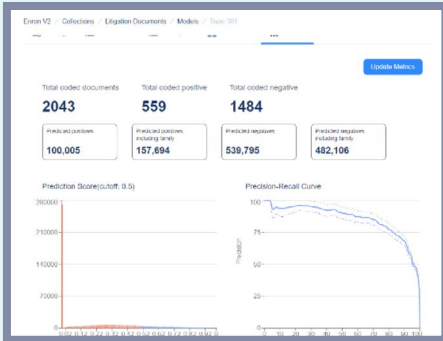

45x faster

Reduce review costs by up to

65%

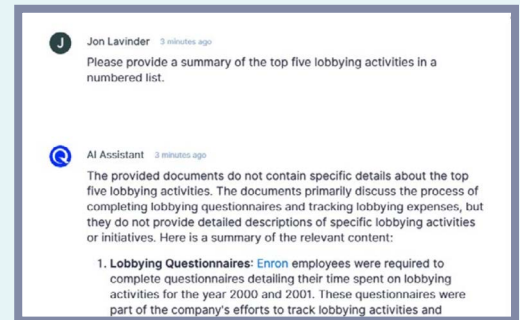

Increase review speed and cost efficiency using Epiq AI to automate document classification and generate defensible output.

- Automatically translate review protocols or instructions into AI prompts.
- Classify documents for issues, relevance, PII, and privilege.
- Use in conjunction with Technology Assisted Review (TAR) or Continuous Active Learning (CAL) to reduce lawyer review up to 90%.
- Classify documents in any language.
- Gain visibility into AI performance with review metrics.

Enhance early data analysis, case strategy, and work product using Epiq Assist to uncover hidden insights.

- Ask natural language questions about the data and receive instant answers linked to source documents.
- Conduct analysis at any time on all or part of the dataset.
- Automatically generate event timelines.
- Create witness fact sheets summarizing background information, communications, relationships, and connections to events.
- Submit requests and get responses in your desired language.

Epiq Differentiators

- Classify documents for unlimited issue tags.
- Update review protocols and re-run classification without triggering additional fees.
- Interrogate large datasets using Epiq Assist without filtering first.
- Enter limitless queries in Epiq Assist without incurring extra charges.
- Access through the Epiq Service Cloud, a fully managed private cloud designed to meet the security and compliance standards that legal requires.
