

epiq precision

Bottom Line, We're in the Efficiency Business

Around the corner and around the world, high-performing clients rely on Epiq experts, technologies, and data centers to streamline the complex, costly, and time-consuming administration of litigation, investigations, financial transactions, regulatory compliance, and other business operations. We bring valuable efficiencies and other improvements to these vital tasks.

Court reporting solutions

The costs and logistical burdens surrounding any matter can be daunting for any firm. From background preparation to the courtroom to the final transcript, too much is at stake for there to be any delays.

With our expert staff ready to assist every step of the way, Epiq can guarantee a comprehensive, reliable and consistent experience across all of our service offerings.

Expert transcription

Epiq will collect, record, and transcribe interviews, meetings or hearings from various audio formats, which can all be displayed electronically.

Rapid reporting

Real-time court reporting means Epiq can supply a complete electronic transcript before anyone has even left the deposition room. Testimony processing and scheduling of subsequent depositions can begin immediately.

eDiscovery solutions

You need volumes of data collected, imported, synthesized, reviewed, and ready to produce – by yesterday. Epiq delivers with higher levels of quality assurance, budget clarity and predictability – from the simplest data collection to the most complex document reviews. We customize delivery to your needs.

Project-based services

Epiq project-by-project services offers the flexibility of per-GB or per-custodian pricing options and gives you the confidence and agility to complete each job quickly and accurately. From case management consultation to review and trial preparation — you will be supported 24/7 by subject matter experts and industry-leading eDiscovery technology.

Managed services

Epiq has more eDiscovery managed service engagements than anyone in the industry. Managed services provide corporations and law firms the security they depend on, the processes and workflows required

and the cost predictability desired. A fixed monthly fee delivers your own infrastructure and user licenses to house as many cases as you need. This approach reduces operational inefficiencies caused by going from one vendor to another.

Document review services

Regardless the size of your review, our document review experts will work closely with you to develop a strategy designed for your review, leveraging industry-leading technologies and best-in-class review professionals to reduce your cost and exceed your expectations. Solutions range from staffing to fully managed review and anything in between.

ANZ eDiscovery core services

- Expert consulting, forensics and collections
- Electronically stored information (ESI) mapping, preservation, processing and hosting
- Early case assessment (ECA), predictive coding and electronic review tools
- Document review services:
 - Managed review
 - Staffing
 - On-site solutions

Trial technologies

In the digital age, the volume of material before the court is growing and creating new document management challenges. Advances in technology have streamlined the trial process, while fostering the growth of intuitive and efficient work processes.

From eHearings to electronic court book management and consulting, Epiq is the answer.

Electronic evidence presentation

An Epiq eHearing Consultant will coordinate proceedings, controlling the presentation of documents and ensuring the flow of the hearing is uninterrupted. Paginated hard copies in tabulated

on high-definition monitors located at the bench, bar tables and witness box. Consequently, documents are presented 30% faster than in a paper-based hearing.

Online review book

The Online Review Book is a proven replacement for paper-based hearing preparation, allowing practitioners to prepare with the security, efficiency and flexibility of modern technology. The Online Review Book is delivered as a secure web service accessible from any location, including the hearing room, offices, chambers, home and any other location where an internet connection is available.

Track record

Epiq has delivered more than 50 successfully executed electronic hearings in ANZ – boasting the most secure, customisable, and client-centric service offering.
