

# epiq reliability

unparalleled experience responding to requests by domestic and international regulatory agencies to collect, assess, and produce highly sensitive data relating to acquisitions and mergers

Veteran teams of operations and consulting professionals help guide the corporate legal team and their outside counsel with respect to the regulatory disclosure requirements established by agencies such as the Department of Justice (DOJ) and Federal Trade Commission (FTC).

100+

To date, Epiq has supported over 100 Second Requests, Canadian SIRs, and European Commission investigations.

Experienced teams of data, technology-assisted review, and document review professionals work with our clients to establish a **project plan** that serves as the road map for the defensible collection, analysis, prioritization, review, and production of their data.

100+100+100+

With a track record of hundreds of successful technology-assisted review (TAR) projects, Epiq has been a leader in the growing acceptance and use of TAR, particularly by regulatory agencies engaged in antitrust reviews.

Our production operations run 24/7 and are supported by over 150 production engineers.

27

Epiq has 27 full-time review managers globally. These individuals are lawyers who have extensive experience managing large and high stakes projects.

Epiq offers deep domain expertise around the Canadian Competition Bureau's SIR and Section 11 enforcement guidelines.

The Epiq international processing and review centers can handle investigatory requests from the European Commission and individual countries:

The regulatory scheme in Europe is changing quickly, as the European Commission and individual countries are more aggressively investigating a wide variety of merger activity and company protocols, especially concerning the privacy of users.

The Epiq project management, technology-assisted review, and document review teams are placed strategically to effectively navigate these emerging trends.

Epiq is also adept at managing projects in multiple jurisdictions, to assure a consistent and defensible global approach.

Our processing volumes are typically 3-5 terabytes, with our largest matters topping 10 terabytes.
