

Bringing eDiscovery excellence to Germany

Seamless global reach, top-tier security, and an experienced team ready to help you take on any size project anywhere in the world.

Local convenience, global reach

80+ offices across four continents positions Epiq to deliver beyond client expectations wherever needs may arise. In Europe and Asia-Pacific, we boast 18 offices and eight data centres, giving you the local expertise, incountry data security and global reach you need.

Expertise in Germany

Epiq has been working closely with global law firms and corporations to solve eDiscovery challenges in Germany since 2015. As a global leader in providing best-quality legal technology products and services for electronic discovery and document review, we tailor our approach to your unique needs, no matter the location, size, or complexity of your project.

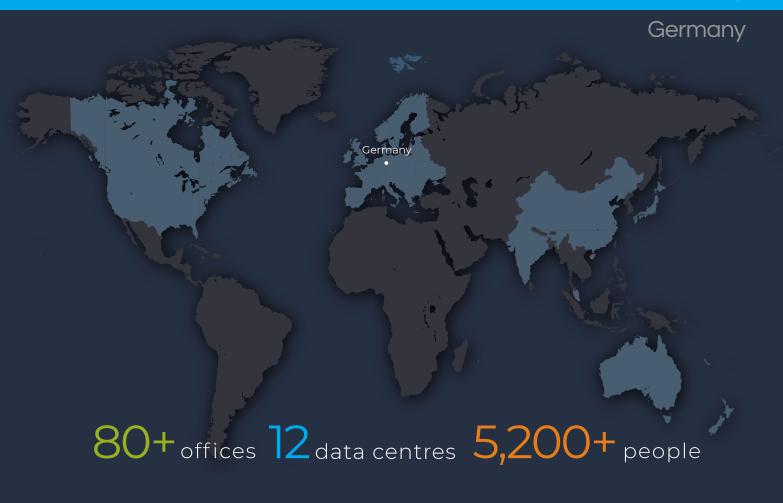

What we offer

- · Expert consulting, forensics, and collections
- Electronically stored information (ESI) mapping, preservation, and processing
- Early case assessment (ECA), predictive coding, and electronic document review tools
- Document review services, managed review, and staffing
- · eDiscovery managed services

Security

- We maintain a multi-layered security program utilising leading commercial technology to provide defence against both external and internal attacks.
- We operate an ISO 27001:2013 certified data centre in Germany, with hardened exteriors sitting on dual power grids, employing generator backup, and 24/7/365 closed circuit and manned monitoring.
- Epiq maintains a full-time staff of certified information security professionals to manage our security program. Regular audits and risk assessments are combined with an advanced intelligence network to assess potential security risks and Epiq's ability to meet emerging threats.
- Epiq employs the latest backup methodologies with a variety of disaster recovery options to meet a wide range of data recovery requirements.
- We provide hardened network security controls that are required to protect work product and ensure privacy.

People. Partnership. Performance.

Experience and expertise

Consulting services—discovery preparedness, litigation, regulation and practice support, records management, early case assessment (ECA), and information governance, including General Data Protection Regulation (GDPR) services.

eDiscovery services—data collection, forensic analysis, processing, hosting, document prioritisation, and production. We facilitate early case assessment, highly scalable processing, and the most efficient review and production of eDiscovery data, by using our proprietary management platform or a range of market leading third party tools.

Document review services—we manage the review of large document collections in eDiscovery projects, provide qualified legal professionals, develop document review protocols, provide project management, and staffing services.

Epiq on-site solutions—we provide data processing and hosting capabilities via our portable solution, a server environment that can be deployed in-situ at client sites, with Epiq experts providing on-site assistance from the point of data collection all the way through to supporting document review.

eDiscovery managed services (EMS)—we provide a holistic, enterprise-wide approach to eDiscovery. EMS eliminates the upfront costs of purchasing hardware and software. We provide every capability needed to reliably perform eDiscovery—software, hardware, people, and processes—and the workflow management to make these capabilities work together.

Artificial intelligence & predictive coding—by deploying Technology Assisted Review (TAR) tools we help clients save money, meet deadlines, mitigate risk, and increase consistency of document review projects.

Court reporting & transcription services—we provide a range of flexible, affordable, and accurate recording and transcription services.
