Find and synthesize countless points of data with epiq clarity.

Transform data into knowledge accurately and efficiently with today’s most complete suite of powerful eDiscovery solutions.

Project-based services
Epiq’s project-by-project services offer the flexibility of per-GB or per-custodian pricing options and give you the confidence and agility to complete each job quickly and accurately. From case management consultation to review and trial preparation — you will be supported 24/7 by subject matter experts and industry-leading eDiscovery technology.

Managed services
Epiq has more eDiscovery managed services engagements than anyone in the industry. Managed services provide corporations and law firms the security they depend on, the processes and workflows required and the cost predictability desired. A fixed monthly fee delivers your own infrastructure and user licenses to house as many cases as you need. This approach reduces operational inefficiencies caused by going from one vendor to another.

Document review services
Regardless of the size of your review, our document review experts will work closely with you to develop a strategy designed for your review, leveraging industry-leading technologies and best-in-class review professionals to reduce your cost and exceed your expectations. Solutions range from staffing to fully managed review and anything in between.

You need volumes of data collected, imported, synthesized, reviewed, and ready to produce — by yesterday. Epiq is the largest and most experienced eDiscovery service provider across the globe and delivers with the highest level of quality assurance, budget clarity and predictability — from the simplest data collection to the most complex document reviews. We customize delivery to your needs.

world-class resourcefulness

Project management makes all the difference in your world.

Our project management capabilities guide our clients through the eDiscovery process, help our clients avoid errors, and provide greater visibility into the course of the project from start to finish.

Our deep project management expertise across various industries and matter types drives efficiency for our clients. This allows them to spend less time on eDiscovery, trusting our expert project managers to handle their eDiscovery projects.
### high-performing results
