

epiqreach

Bringing eDiscovery excellence to Hong Kong

Seamless global reach, top-tier security and an experienced team ready to help you take on any size project anywhere in the world.

Local convenience, global reach

Your success is our goal. No matter the size or complexity of your project, Epiq is committed to supporting you with comprehensive legal support services to help you consistently achieve your eDiscovery objectives.

Global expert

Epiq has been working closely with global law firms and corporations to solve eDiscovery challenges in Asia since 2008. As a global leader in providing best-quality legal technology products and services for electronic discovery and document review, we tailor our approach to your unique needs — no matter the location, size or complexity of your project.

Local partner

We are a truly local, full-service eDiscovery provider in Greater China. Epiq has local leaders and staff fluent in Chinese who possess expertise in local cultural professional and regulatory practices.

Located in one of the world's leading international financial hubs, Epiq in Hong Kong can help you manage eDiscovery projects in the diverse legal and regulatory landscapes that exist among Asian countries.

End-to-end eDiscovery services

- Expert consulting, forensics and collections
- Electronically stored information (ESI) mapping, preservation, processing and hosting
- Document review services:
 - Managed review
 - Staffing
- Audio searching and review services
- Early case assessment (ECA), TAR and predictive coding tools
- On-site solutions

On-site solutions

On-site solutions ensure compliance with data security and privacy regulations and corporate security protocols, enabling you to process and review information on your own premises, behind your own firewalls. Epiq's on-site solutions allow you to conduct investigations or meet other critical needs wherever and whenever the need arises, and our document review services help you scale and utilize your human resources efficiently.
