epiq bankruptcy

Premium Data Services

Automated data extraction from filed bankruptcy documents

- Analyzing Risk
- Filing Validation
- Compliance Reviews
- Auditing Purposes

Transform costly manual processes by converting unstructured data to structured data

What Is It?

Filed bankruptcy documents in PDF format (unstructured data) are re-opened up to 15 times throughout a bankruptcy lifecycle for various use cases. The Premium Data Service converts thousands of data points within filed documents into structured formats to be re-used without re-opening the documents again.

Key Use Cases

Decrease the time, errors and expense for:

- Compliance Reviews
- Audits
- Validations
- Loading Data Warehouses

Form Title	Case Link	Filed	Total Amount
Proof of Claim	17-21137	10/27/2017	
Notice of Mortgage Payment Change	17-21137	8/16/2018	$3,213.62
Notice of Mortgage Payment Change	17-21137	8/21/2019	$3,268.75
Notice of Mortgage Payment Change	17-21137	6/10/2020	$5,015.53
Proof of Claim	17-22551	10/13/2017

- Accelerate Document Search
- Streamline Bankrutcy Workflows
- Optimize Case Audits

Discover Automated Processes for Your Business

Tired of spending thousands of hours trying to mine through mountains of bankruptcy data? Learn about how a top mortgage provider streamlined their bankruptcy portfolio document review and benefited from automating their Statement of Intent process.

Accelerate Bankruptcy Document Search

Learn how a servicer saved 10,000 hours by automating the identification of bankruptcy documents, lifting data from filed PDFs and returning the data in a structured format for inclusion in their data warehouse.

Automate Claims Register Review

During a bankruptcy lifecycle, identifying if a Proof of Claim (POC) and/or Transfer for Claim (TOC) is filed on time was key for this large financial customer to remain compliant within their workflow. See how this customer streamlined its workflow by replacing its manual claims register review with an automated process, ensuring compliance every step of the way.

Optimize Bankruptcy Case Audits

Bankruptcy case audits can be a daunting and time-consuming task, especially when dealing with high volumes of payment change notices. Learn how a servicer streamlined its case audits by saving an average of 6 minutes per audit, resulting in a total of 2,000 saved hours.
