

Electronic Bankruptcy Noticing

Migrate bankruptcy notices from traditional physical mail to electronic delivery

NOTICE DELIVERY OPTIONS

Simplify the bankruptcy noticing delivery process today! With Electronic Bankruptcy Noticing (EBN), you can count on the reliable, secure, delivery of bankruptcy notices electronically. For each notice received, Epiq AACER parses the data, consolidates the results and provides a daily report through MyAACER® within the AACER portal.

Within the AACER portal, users may access the summary and image filed within the U.S. Bankruptcy Courts with a single click. Epiq AACER will provide a comparison report from what Epiq AACER is actively docket monitoring and comparing the monitored records to the notices electronically received identifying any gaps within the process.
