

Assure timely compliance with discovery requests on high-profile antitrust matters.

Partner with a team of dedicated professionals with significant technical and substantive antitrust experience who understand evolving regulatory requirements. Deploy defensible AI discovery strategies for accurate and timely compliance with requests by government regulators and adverse parties.

- Quickly and efficiently collect relevant data with an experienced forensics team that understands global data privacy requirements and has broad knowledge about emerging data sources.
- Deploy advanced analytics workflows that are approved by government regulators and accepted by private parties to identify relevant data.
- Use AI tools to identify privileged documents and assist in the creation of privilege logs that meet government specifications.
- Support post-compliance advocacy efforts, including hearings, depositions, and litigation challenges.
- Generate metrics and reporting that assure defensibility.
