

Epiq AACER SCRA

Elevate Your Compliance: Epiq AACER's SCRA Verification Solution

In today's fast-paced legal environment, staying compliant with the Servicemembers Civil Relief Act (SCRA) is non-negotiable. Epiq AACER delivers a powerful SCRA verification service that safeguards your organization from legal risks and eliminates labor costs associated with traditional SCRA searches.

Streamlined Verification Process

Epiq AACER's SCRA verification system integrates directly with the Defense Manpower Data Center (DMDC) database, providing accurate eligibility status and official certification documents. Our process ensures you identify eligible debtors swiftly, efficiently and retain proof of eligibility.

Three Steps to Compliance Success

Our solution simplifies SCRA verification into three straightforward steps:

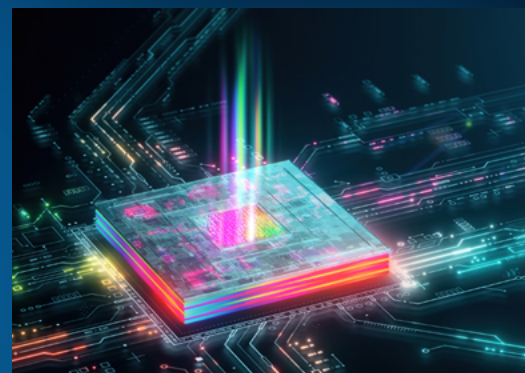

Step 1: Validate

- We validate your input file to ensure successful requests for verifying the military status of debtors in your portfolio.
- This step guarantees data accuracy and integrity, reducing errors and ensuring effective searches.

Step 2: Process

- Each debtor is cross-referenced against the DMDC database to confirm SCRA qualification.
- Whether you require ad hoc checks or recurring searches, our flexible processing caters to your portfolio size and needs, saving you time and resources.

Step 3: Output

- Results are delivered via SFTP or directly through the AACER platform user interface.
- You'll receive eligibility statuses and any requested certificates, all accessible for immediate review.
- This streamlined output empowers you with the necessary information for decisive action and compliance assurance.
