# Simplify, accelerate, and reduce the cost of evidence discovery while maintaining quality and defensibility.

Access critical information faster by processing, analyzing, and reviewing data with an eDiscovery platform that automates workflows, surfaces deeper insights, and scales to handle matters of all sizes.

eDiscovery Review

Reduce review time and cost while improving consistency and defensibility by using Continuous Active Learning (CAL) to prioritize documents for review and Epiq AI Discovery Assistant™ to automate classification.

Early Case Assessment

Understand your risk exposure, lower costs, and shape matter strategy early by using expedited processing, filtering, and analysis tools with Epiq Assist™ to clarify custodians and concepts, and reduce downstream review.

Internal Investigations

Accelerate investigations using Epiq Assist to ask natural-language questions across the full dataset and automatically generate timelines and witness fact sheets that surface critical facts and additional areas for investigation.

Deposition Preparation

Secure a strategic advantage in depositions by using Epiq Assist to surface key insights and generate deposition memos and questions up to five times faster.

HR, Employment, and Compliance Matters

Understand potential risks and resolve matters faster by using data analysis, filtering, and Epiq Assist to analyze large datasets and uncover hidden events, relationships, and communications cost effectively.

Why Epiq Legal Solutions?

Experience the advantage of solutions from a partner specializing in legal.

Drive decisions with AI solutions that combine people, process, technology, and data.

Conduct fact research up to 45x faster with Epiq Assist™

Up to 7x
faster processing

50%
overall time savings

Up to 70%
platform cost savings

Connected Workflow

Epiq Discover, **Epiq AI Discovery Assistant™**, **Epiq Assist™**, and **Epiq Narrate™** create a unified experience in the Epiq Service Cloud that accelerates review, streamlines fact development, and connects matters from investigations through trial. With Epiq Discover, users can:

Collect and Process

Data Collection
Collect data from email, cloud platforms, mobile devices, and messaging tools into a unified, review-ready format.

Expedited Processing
Obtain fast access to data by processing up to seven times faster than leading alternatives.

Analyze

Epiq Assist
Interrogate all or part of the data, generate timelines, and create fact sheets with Epiq Assist for instant insights with links to source documents.

Early Data Assessment
Analyze conceptual relationships, refine keyword sets, and use Epiq Assist to quickly uncover key information.

Search Builder
Build complex, nested queries with an intuitive interface.

Review

Data Transformation
Accelerate review with AI summarization, transcription, and translation.

Automated Classification
Classify documents for unlimited issues, relevance, PII, and privilege using Epiq AI Discovery Assistant.

Continuous Active Learning (CAL)
Accurately prioritize documents for review by learning from reviewer decisions.

Epiq Differentiators

— Get on-demand access to technical support, training, product guidance, and professional services through an integrated helpdesk.

— Meet data security criteria using a platform that holds SOC II Type II certification and is built on the AWS ISO 27001 framework that incorporates guidance from NIST, HIPAA, and international data privacy regulations.

— Enable users at all levels of technical ability with an interface designed for quick onboarding.
