

Professionally meet ongoing forensic collection demands.

Eliminate the need to obtain services for individual jobs with an embedded team that skillfully executes all collection needs for a fixed monthly fee.

Meet tight collection deadlines with experts who defensibly collect data and metadata from any source using commercial tools under strict chain-of-custody control, all without damaging critical information.

Work with a dedicated team that has appropriate permissions for access to data, tools, and infrastructure within your organisation.

Assessment	Collections
Set up your organisation for success by basing your programme on an assessment of data risks, inefficiencies, work product delays, and transparency issues.	Collect data from any source, including laptop hard drives, mobile devices, Microsoft 365 data sources, and cloud or server shares.
Coordination	Integration
Meet global needs with coordinated, multi-regional teams that utilise consistent processes.	Access custom workflows designed and integrated within your current infrastructure.
