

Holistically manage data across your enterprise for enhanced visibility, searchability, and governance

Inventory your data environment to create a single data map and catalogue that includes structured and unstructured data from on-premise, cloud, and hybrid sources. Implement data governance policies and procedures with Microsoft Purview data governance tools to enhance visibility and searchability for Microsoft, non-Microsoft, and third-party cloud data sources.

Why Epiq Legal Solutions?

Experience the advantage of solutions from a partner specialising in legal.

Drive decisions with AI solutions that combine people, process, technology, and data.

1 Create a Data Strategy

- Meet the unique needs of legal, security, and IT stakeholders.
- Position your company for defensible, secure, and responsible AI readiness.

2 Inventory Data

- Understand your data landscape with a visual representation.
- Organise and describe data within its business context.
- Find leaked PII and sensitive data.

3 Label Data

- Define business terms and their meanings.
- Identify and label sensitive information with automated scanning, classification, and labeling.
- Simplify data management by packaging curated data.

4 Apply Policies and Controls

- Meet regulatory requirements with policies and processes to protect data.
- Improve data accuracy and usability with data quality controls.
- Allow collaboration with role-based access controls (RBAC).
