# Increase review speed, accuracy, and cost efficiency beyond traditional TAR or linear review.

- Complete reviews up to 90% faster than traditional TAR or linear review.

- Automate more than 80% of traditional review processes.

- Review data for issues, privilege, and responsiveness using prompts and models automatically created from review protocols.

- Without repeating workflows, explore new insights that could not have been uncovered using natural language search.

- Safeguard matter data with AI that uses private language models that do not train public models.

Features

– Uncover new insights unavailable using natural language search with AI that automatically surfaces relationships between key players, events, facts, and evidence.

– Use a chat interface to question review data and receive answers linked to cited evidence.

Why Epiq Legal Solutions?

Experience the advantage of solutions from a partner specializing in legal and compliance.

Drive decisions with AI solutions that combine people, process, technology, and data.

Achieve
90%
faster review

Automate
80%
of traditional review processes

Analyze up to
## 500,000
documents per hour

Reimagine your discovery process with first-of-its-kind AI.

Features

– Identify relevance, unlimited issues, and privilege directly from review protocols or written instructions.

– Review pre-processed and annotated files with automatic entity extraction and linking, infusing Knowledge Layer context for accurate tag prediction.

– Enhance accuracy with support from pre-trained models for topics such as anger, joy, business plans, and financial documents.

– Ask questions and get responses in your desired language, regardless of the languages present in your files.

– Gain visibility into AI decision-making and performance with accuracy, precision, and recall metrics.

Document Classification

Epiq Differentiators

— Increase accuracy with AI that applies the best model for each review task in real-time.

— Reduce the risk of missing something important and develop a stronger case strategy with AI that surfaces insights lawyers cannot otherwise find.

— Finish reviews faster and for a lower cost with AI that predicts tags for relevance, unlimited issues, and privilege.

— Achieve cost and ROI goals for every matter with the ability to edit, save, version, and reapply protocols without triggering additional fees.

— Build adaptable discovery processes by adopting model-agnostic AI compatible with your existing workflows.

— Access through the Epiq Service Cloud, a fully managed private cloud that meets the security and compliance standards legal requires.

Expedite your eDiscovery process with managed review teams using Epiq AI Discovery Assistant™.
