# Centralise data for operational efficiencies, AI readiness, and reduced costs

Migrate legal repositories, compliance archives, and unstructured data using defensible processes. Reduce costs, increase AI-response accuracy, and lower risks by retaining only the data you need with expert-led technology and workflows. Create long term efficiencies by applying sound data governance principles.

Legal and Compliance Archive Migration

- Use defensible processes that meet legal and regulatory mandates.
- Include full chain-of-custody reports during migration.
- Maintain operational continuity with a migration plan designed to reduce downtime.
- Use Microsoft Purview tools for data protection and compliance.
- Identify legacy platforms to eliminate.
- Move data away from environments including SourceOne, Enterprise Vault, Proofpoint, Smarsh, Mimecast, and more.

Unstructured Data Migration

- Optimise the use of AI by consolidating data to a central repository and eliminating stale data.
- Get rid of excessive data during data migration by defining and applying data management processes.
- Eliminate licensing, maintenance, infrastructure, networking, and backup costs for inactive environments.
- Consolidate data following mergers and acquisitions with tenant-to-tenant migrations.
- Strategically ingest data during M&A.

Why Epiq Legal Solutions?

Experience the advantage of solutions from a partner specialising in legal.

Drive decisions with AI solutions that combine people, process, technology, and data.

175 billion+ items migrated

Epiq Differentiators

- 20+ years securely and compliantly migrating data
- Large, complex Fortune 100 migrations
- Industry specific tools and data types
- Single provider for your full data management lifecycle

Non-Profit Classifies and Migrates Data in Compliance with Microsoft Information Protection Classification
