

CUSTOMER REVIEW

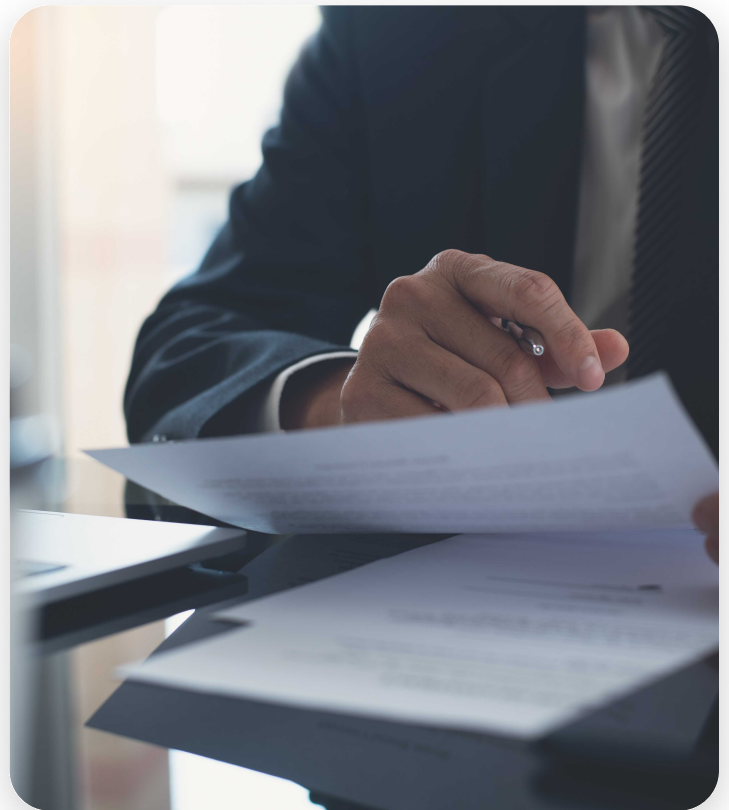

Epiq Bankruptcy Analytics Gets High Praise from Propel Paralegal

As a provider of professional legal services, Propel Paralegal Services relies heavily on accurate, timely and actionable data. In this context, Epiq Bankruptcy Analytics has emerged as an invaluable tool that empowers our decision-making processes and provides a competitive edge in the dynamic landscape of bankruptcy law.

From the get-go, Epiq sets itself apart with its data-rich platform, which pools vast amounts of data from bankruptcy filings, court decisions and other relevant sources. It's not just the volume of information that impresses, but the usability. Epiq's interface is intuitively designed and easy to navigate, making the process of sourcing and interpreting data straightforward, even for those not particularly tech-savvy.

The real gem of Epiq, however, is its robust analytics capabilities. Using cutting-edge technology, the platform offers deep insights into bankruptcy trends, risk assessments, and outcome predictions. These data-driven analytics are instrumental in informing our strategic planning, helping us anticipate market shifts, and enabling us to deliver better client outcomes.

The thorough analysis, in particular, is a game-changer. It provides detailed historical data and current market trends, greatly supporting our decision-making process. It effectively adds a layer of confidence and assurance to our actions, which is pivotal in the uncertain realm of bankruptcy law.

The Epiq team also deserves praise for their responsive customer service. They are prompt, professional, and committed to resolving issues or answering queries, enhancing the overall user experience.

In terms of pricing, Epiq offers a competitive rate, and given the significant value it adds to our operations, we consider it a worthy investment. As they say, the best data often inform the best business decisions, and Epiq Bankruptcy Analytics provides that in spades.

Given our experience, Propel Paralegal Services plans to maintain its subscription to Epiq Bankruptcy Analytics for the foreseeable future. This platform has transformed our approach to data and analytics in bankruptcy law, and we highly recommend it to other professionals in the field looking for a potent blend of data, technology, and actionable insights.

In conclusion, Epiq Bankruptcy Analytics has exceeded our expectations, earning a well-deserved five-star rating from us. It's not just a tool; it's a game-changer in the realm of bankruptcy analytics.
